

WE'RE PLEASED TO  
PRESENT F22 ALIGNERS,  
THE INVISIBLE ALIGNERS

“Nobody notices I’m wearing an appliance. I never thought this dream would come true”.

THE INVISIBLE SOLUTION  
FOR A PERFECT SMILE

# FEEL FREE TO SHOW YOUR SMILE

**You can find the smile you've always wanted with an invisible and comfortable treatment.**

With the new F22 system, you'll receive a series of thin removable aligners that are custom-made using an exclusive extra-transparent plastic material, so that they can guide the gradual and progressive movement of your teeth towards the desired position, giving you an aesthetically and functionally optimal occlusion.

**INVISIBLE**

NOBODY WILL NOTICE THAT YOU'RE WEARING ALIGNERS, BECAUSE F22 IS TRULY TRANSPARENT.

**And the rounded edges of F22 aligners are also finished with particular care, using a new technique.**

You can wear them with the confidence of never needing to change your habits, without feeling any kind of discomfort and with the certainty of results that are 100% predictable.

F22 is not only an invisible therapeutic option that is an alternative to conventional devices. The highly elastic material from which it is made is able to transmit light and constant forces to ensure even more rapid and comfortable treatment.

COMFORTABLE

“I always wear them but they never bother me. F22 aligners are really soft and comfortable”.

THE TRANSPARENT CHOICE FOR  
A CONFIDENT SMILE

“After treatment with F22 aligners,  
I can finally let everyone see my  
smile without limitations.  
It was so quick and easy!”

EASY TO USE, WITH  
EFFECTIVE RESULTS

## DIGITAL PRECISION THROUGHOUT THE ENTIRE TREATMENT: EASY TO USE, WITH EFFECTIVE RESULTS

Thanks to direct contact between the aligners and your dental arch, control over tooth movements is extremely precise, and the results are totally predictable. In fact, F22 aligners fit the morphology of your dental arch with exceptional precision.

**Ask your dentist to show you your treatment plan by watching the three-dimensional video, which will illustrate the progressive movement of your teeth until you reach the smile you've always wanted.**

PRECISE

# TRUST IN SCIENTIFIC RESEARCH: F22 ALIGNERS ARE DEVELOPED, DESIGNED AND PRODUCED IN ITALY USING THE MOST ADVANCED TECHNOLOGIES AVAILABLE

**22 years of clinical experience and 14 years of research by Ferrara University have created an innovative product that gives back a natural smile to all adolescents and adults affected by malocclusions.**

The planning of every single case is studied analytically by the same team that developed the F22 system. Its components instead are produced using advanced technologies by Italy's leading multinational in the dental manufacturing sector, reducing times and costs.

**EFFECTIVE**

“We’re very enthusiastic about our choice of F22 aligners.  
Our new smile makes us feel a lot more confident!”

DEVELOPED, DESIGNED  
AND PRODUCED IN ITALY

# FREQUENTLY-ASKED QUESTIONS

## How long does the treatment last?

The time necessary to complete the treatment varies significantly according to the complexity of each case, but generally it lasts between 8 and 16 months. Discuss the options and possible treatment plans with your dentist.

## Why does it work?

Aligners control the degree and times of tooth movement. Movements of the teeth occur delicately, in a controlled and gradual manner.

In every phase only a certain number of teeth must be allowed to move, as defined by the initial treatment plan. The result is a system of light and constant forces that are highly effective in moving the teeth to the required position.

## What material are F22 aligners made from?

The F22 system is produced digitally using a resistant, elastic and biocompatible thermoplastic material that is certified for medical applications.

## How often will I need to return to my dentist during treatment with F22?

Appointments with F22 patients are usually very quick and are made every 4–6 weeks, to allow the practitioner to check the progress of treatment and to consign the next pair of aligners.

## What should I do during meals?

F22 aligners are removable, and they are strongly recommended not to be worn while eating, to prevent them from being stained by food colouring pigments. This is a great advantage from the viewpoint of oral hygiene with respect to conventional devices with brackets and wires.

Before wearing your aligners again, remember to clean your teeth thoroughly and correctly.

**ASK YOUR DENTIST TO SHOW YOU YOUR TREATMENT PLAN BY WATCHING THE THREE-DIMENSIONAL VIDEO, WHICH WILL ILLUSTRATE THE PROGRESSIVE MOVEMENT OF YOUR TEETH UNTIL YOU REACH THE SMILE YOU'VE ALWAYS WANTED.**
